

Change the way you experience sound

Samsung Galaxy Buds+ are versatile earbuds that harmonize warm, satisfying bass tones with crisp high notes delivering addictively rich tracks. With the ability to selectively tune in or out environmental noise, you can stay in the zone on a phone call or get lost in your favorite playlist, all without hitting pause. With a battery that is built to go all day¹ and a customizable fit, Galaxy Buds+ are designed to move to your rhythm.

Exactly what you want to hear

Galaxy Buds+ are the perfect fitting earbuds to isolate you from distracting noises, so you can stay focused on what you want. And if you'd like to filter in some of the outside world to be more in-tune with your surroundings, you can switch on Ambient Aware². Hear flight announcements, oncoming traffic or your order number while still enjoying your favorite playlist or podcast.

22 hours of serious sound

Get up to 11 hours of nonstop music on a single charge, then pop your Galaxy Buds+ in the wireless charging case and get nearly 11 more. Forgot to charge them the night before? No worries. 3 minutes of charging gives you one hour of play time, so you have enough juice for your commute or workout.

Premium Sound by AKG

Galaxy Buds+ delivers a superb dynamic range and exceptional sound accuracy thanks to the woofer and tweeter inside each tiny bud. You'll feel the thundering bass and hear nuanced, studio-quality sound no matter what you're listening to.

Your voice, loud and clear

Ensure you're heard clearly. A dedicated internal and two external microphones pick up your voice and isolate it from outside noises. When you're on a call, your voice comes through richly and confidently, even in noisy locations.

All day comfort

Three adjustable ear and wing tip sizes come in the box to ensure these earbuds are a secure, comfortable fit. Mix and match each piece to find the perfect fit for any ear shape or size.

One step to connect your Galaxy

Built to pair seamlessly with Galaxy Note10³, control Galaxy Buds+ from your Galaxy smartphone, smartwatch, tablet, or even with voice assistants like Bixby or Alexa.

Share the power

Don't interrupt your flow. Charge Galaxy Buds+ on the go with your phone using Wireless PowerShare. Place your buds on the back of your Note10 or other compatible Samsung devices⁴ for a quick charge by sharing your phone's battery.

Switch between devices seamlessly

Pair two compatible devices at once and Galaxy Buds+ will intuitively switch via Bluetooth. So you won't miss a call on your phone if it comes in while you're streaming a movie on your tablet.

Android & iOS compatible

Pair with smart devices via Bluetooth.⁵ Use the Galaxy Wearable app on Android and Galaxy Buds+ app on iOS to make the most of your earphones.

Safe from sweat and spills

Thanks to IPX2⁶ splash-resistant technology, Galaxy Buds+ can handle a light drizzle, a little sweat, even the accidental spill.

Just tap to control

Everything is at your fingertips with Galaxy Buds+. Pause your playlist, answer calls, skip tracks, and adjust the volume simply by tapping the earbuds. Customize your touch commands for a more personalized experience, even create your own shortcuts, like opening Spotify instantly with one long press. This intuitive UI puts you in control of your music and more.

1 Average battery life of Galaxy Buds+ without charging is up to 11 hours, based on typical usage. Case provides up to another 11 hours of battery life for Galaxy Buds+ when Galaxy Buds are stored and charged between use. Battery life will vary.
2 Features including Ambient Aware enabled through the Galaxy Wearable app on Android, available through Google Play Store, and the Galaxy Buds+ app on iOS devices, available through the App Store.
3 Connection pop-up window will appear only on Samsung mobile devices running Android 7.1.1 or later that have the SmartThings app installed. If the popup window does not appear, update the SmartThings app to the latest version.
4 Wireless PowerShare limited to Samsung or other brand smartphones and accessories with WPC Qi wireless charging. Check samsung.com for compatibility. May not work with certain accessories, covers, or other brand devices.
5 Compatible with smartphones and tablet running Android 5.0 or higher and with more than 1.5GB of RAM. Also compatible with iPhone7 or later models with the iOS 10 or higher.
6 Complies with IPX2 water resistance testing standard. Do not submerge; dry after exposure to moisture.
