

Jib True

True Wireless Earbuds

# TOTALLY WIRELESS ESSENTIAL.

Jib True wireless is exactly that: Truly, completely, absolutely free from the hassle of wires. So go ahead: Start listening and living without anything holding you back.

## KEY SELLING POINTS

### USE THEM WITHOUT WORRY.

We know. You're worried about somehow losing one of those little earbuds. That's why we back every pair of Skullcandy true wireless earbuds with our Fearless Use Promise: If you lose or break an earbud or case, we'll replace it at a discount.

### LISTEN LONGER WITH 22 HOURS OF BATTERY.

Yep, that's right. Between those two little earbuds and the charging case, you have enough battery life for 22 hours of music, movies and podcasts. Better make a longer playlist.

### DUAL MICS FOR CLEAR CALLS.

Between listening to music or watching videos, you're probably going to want to take a phone call now and then. That's why we built Jib True with microphones in both earbuds for clean, clear calls. Plus, when you don't want to use both earbuds, Jib True is also designed so you can use either earbud by itself.

### OH-SO-SIMPLE.

Maybe you're the kind of person who likes to keep things simple. Well, friend, you're the reason we made Jib True. They're perfectly straightforward with just the features you need and nothing that you don't.

### EASY TO CONNECT.

Jib True earbuds automatically enter pairing mode the first time they power on. After that, they'll quickly auto-pair with the last device you used.

### EASY TO CONTROL.

Simple controls let you adjust volume, skip tracks, take calls and activate your device's assistant (like Google or Siri) without ever touching your phone.

### SWEAT- AND WATER-RESISTANT.

Wondering if you can work out in Jib True? You bet. They're test-rated against industry standards to shrug off sweat and water.
